

The <i> message is very short, and I cannot read more. The idea is to be able to read more and click on the provided link inside the message

In the Graps and Charts, when the Token Contract is from ETHEREUM, then it should show the ETHERSCN also

Contract details:

Plenty of information is not shown. At the level of code, the web3 has not been used to retrieve this information.

For smart contract code, you have an API that provides that. And the idea is to add link button to open code in a new web page (no need to be structured)

[illegible]

Token Contract Details

Network	BSC MainNetWork
Token Name	QANX Token
Token Symbol	QANX
Token Owner	
Total Supply	33333330000000000000000000000000
Token CirculatingSupply	33333330000000000000000000000000
Contract Verified:	
Contract Source Code	Move into Code
List of Holders	

LIST of holders is not shown for BSC Network
